(2) For trip-free switches, please consult us

(3) Including base

Optimized performance up to 6300 A

DMX³ air circuit breakers and DMX³-I isolating switches are available in Three frame sizes. Three breaking capacities for circuit breakers: 50 kA, 65 kA and 100 kA.

The range covers 11 rated currents, between 630 A and 6300 A. All range of DMX³ air circuit breakers and DMX³-I isolating switches is available in fixed and draw-out version.

- DMX³ 50 kA
- DMX³ 65 kA
- DMX³ 100 kA
- DMX³-I

(1) Available only on DMX³ 2500, 4000 and 6300

LEGRAND ADVANTAGE

The overall dimensions of the breaker contribute considerably to an efficient use of the space inside the electrical panel. The constant depth for all the rated currents, for the frames 2500, 4000 and 6300 facilitates configuration of the enclosures and connection of the busbars.

OTHER ELECTRICAL FEATURES

Rated operational voltage U_e: 690 Vac 50/60 Hz
 Rated insulation voltage U_i: 1000 Vac 50/60 Hz
 Rated impulse withstand voltage U_{imp}: 12 kV
 Category of use: B
 Ambient temperature: - 25 °C to 70 °C
 Humidity: + 55 °C with relative humidity of 95%, conforms to IEC 68-2-30

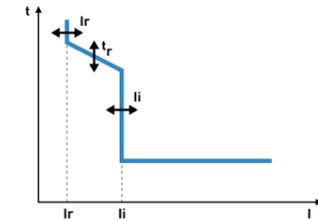

MP4 LI ELECTRONIC PROTECTION UNIT CAT. NOS. 0 281 64 AND 0 288 00

0 288 00

The following settings are adjusted using rotary selector switches:

- Long time delay protection against overloads: I_r
- Long delay protection operation time: t_r
- Instantaneous protection against very high short circuits: I_i
- Neutral protection: I_N

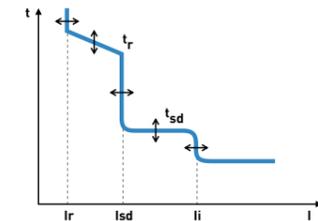

MP4 LSI ELECTRONIC PROTECTION UNIT CAT. NOS. 0 281 65 AND 0 288 01

0 288 01

The following settings are adjusted using rotary selector switches:

- Long time delay protection against overloads: I_r
- Long delay protection operation time: t_r
- Short time delay protection against short circuits: I_{sd}
- Short time delay protection operation time: t_{sd}
- Instantaneous protection against very high short circuits: I_i
- Neutral protection: I_N

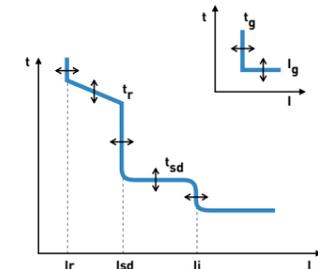

MP4 LSIg ELECTRONIC PROTECTION UNIT CAT. NOS. 0 281 66 AND 0 288 02

0 288 02

The following settings are adjusted using rotary selector switches:

- Long time delay protection against overloads: I_r
- Long delay protection operation time: t_r
- Short time delay protection against short circuits: I_{sd}
- Short time delay protection operation time: t_{sd}
- Instantaneous protection against very high short circuits: I_i
- Earth fault current: I_g
- Time delay on earth fault tripping: t_g
- Neutral protection: I_N

MP4 LSIg electronic protection unit for DMX³ 2500 to 6300

Precise & user friendly LCD tripping units

Besides their easy mounting and connection, strength and good continuity of operation, 3 types of electronic units allow precise adjustment of different limits for current values and time delay.

The result is an efficient protection against electrical faults while maintaining total discrimination with downstream breakers.

The LCD display lets you monitor the measured current values and informs you on fault adjustment and log (the cause of last trip and maintenance operations).

LEGRAND ADVANTAGE

All protection units of DMX³ 2500 to 6300 are equipped with batteries so you can monitor the parameters even when the breaker is not connected and all data remains stored in memory.

MORE INFORMATION

All DMX³ breakers are factory equipped with any MP4 protection unit LI, LSI or LSIg according to your requirements. You just need to select and indicate the 2 catalogue numbers when placing the order (1 for the breaker and 1 for the tripping unit).

MP6 LSI touch screen protection unit

Colour touch screen

LEDs indicating correct operation, pre-alarm and alarm for overload and temperature

Settings lock

Mini USB port for PC connection

ON button

Innovative & user friendly touch screen tripping units

MP6 electronic protection units are equipped with a colour touch screen, particularly user friendly, thanks to intuitive icon-based navigation system. The colour display provides a clear presentation of the parameters of the installation.

Touch screen protection units integrate all the functions of LCD tripping units and have an advanced measurement function which, in addition to monitoring currents, can also be used to display voltages, active and reactive powers, frequency, power factor, and also energy.

Alarms can be programmed on a number of these parameters: max. voltage, min. voltage, voltage imbalance, max. and min. frequency, etc.

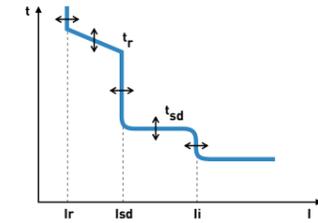

MP6 LSI TOUCH SCREEN PROTECTION UNIT CAT.NO. 0 288 03

Tripping curve preview

The following settings are adjusted using the touch screen:

- Long time delay protection against overloads: **I_r**
- Long delay protection operation time: **t_r**
- Short time delay protection against short circuits: **I_{sd}**
- Short time delay protection operation time: **t_{sd}**
- Instantaneous protection against very high short circuits: **I_i**
- Neutral protection: **I_N**

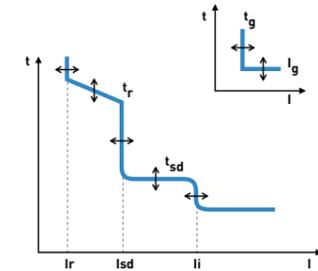

MP6 LSI TOUCH SCREEN PROTECTION UNIT CAT.NO. 0 288 04

Earth fault tripping curve preview

The following settings are adjusted using the touch screen:

- Long time delay protection against overloads: **I_r**
- Long delay protection operation time: **t_r**
- Short time delay protection against short circuits: **I_{sd}**
- Short time delay protection operation time: **t_{sd}**
- Instantaneous protection against very high short circuits: **I_i**
- Earth fault current: **I_g**
- Time delay on earth fault tripping: **t_g**
- Neutral protection: **I_N**

+++++

LEGRAND ADVANTAGE

The icon-based interface of the management software and the innovative touch screen technology used for MP6 tripping units simplify setting and preparing operations of the DMX³ circuit breaker.

MORE INFORMATION

The MP4 and MP6 electronic protection units of the DMX³ ACBs equipped with communication option Cat.No 0 288 05 or 0 281 70 can communicate via an RS-485 port. This port is used for supervising

(remote monitoring and management) the devices in the installation, using the MODBUS protocol. It is therefore possible to control circuit breaker opening and closing, display the electrical parameters and detect all the alarms generated by each device, from a PC. Power Control Station is a software application for PCs allowing to exchange data with the protection unit of the DMX³ through the mini USB port. This software allows to monitor the status of the breaker, display information (firmware and device versions, alarms, measurements, parameters, fault history, settings), update the firmware of the protection unit, generate reports based on the data stored and read by the protection unit, run diagnostic tests.

STARTING MENU

This menu displays the values of I_1 , I_2 , I_3 and I_N as a diagram, the date and the hour, and the alarm icon. If the breaker opens following an electrical fault a specific icon will appear on the upper part of the screen. Pressing this icon will open a new window showing the cause of the last event.

Other possible actions:

- Right arrow icon: access the main menu
- Alarm icon: preview the cause of the alarm in course

MAIN MENU

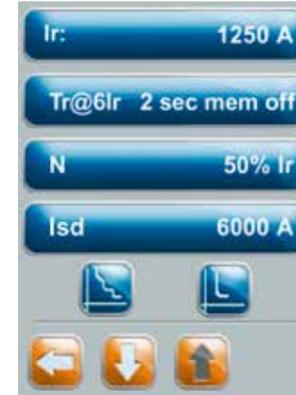

The main menu allows accessing different windows for setting different parameters of the breaker or previewing measured values, battery status, tripping history, etc.

The following accesses are possible:

- 1 Setting according to the tripping curves (current and time)
- 2 Access tripping unit settings (luminosity, contrast and sound volume)
- 3 Access to general information of the breaker
- 4 Back to the previous page
- 5 Access measured values menu
- 6 Access archives
- 7 Preview battery charging status

PROTECTIONS SETTING MENU

Vertical arrows allow scrolling between different electrical parameters:

I_i , I_{sd} , I_{tsd} , I_r , t_r , I_g , t_g , etc.

Pressing horizontal icons gives access to corresponding windows allowing value settings. Each value can be increased/decreased, validated or suppressed. The values need to be saved into memory at the end of the process, for each setting.

MEASURED VALUES MENU

This window allows previewing of measured values for:

- Currents
 - Voltages (Ph/N and Ph/Ph)
 - Active and reactive powers
 - Power factor (total and per phase)
 - Active and reactive energy
 - Harmonics (for currents and voltages)
- Pressing **I**, **m**, **M** and **avg** icons at the bottom of the window will display respectively: instantaneous, minimum, maximum and average value of electrical parameters.

Innovative & user friendly touch screen tripping units

CONTINUED

MP6 electronic protection units collect all the useful information in 5 sections, each one easily reachable via the main menu in order to allow an efficient control.

MP6 electronic protection units have an intuitive graphical interface. All useful information and selected settings are easy to understand and visible at a glance.

For example current values can be visualized on the starting page thanks to a histogram. Different other settings can be simultaneously displayed on the "settings" screen in order to have a global view.

MORE INFORMATION

• The following events and values are registered into memory and can be accessed via specific menu: cause of the last event, event counter, events history with date and hour, alarms history with date and hour

- MP6 tripping units allow following application: logical selectivity, management of non priority loads, contact management (with Cat.No 0 288 12)
- MP6 tripping units allow following alarms: power reverse, current imbalance, maximum and minimum voltage values U_{1N} , U_{2N} , U_{3N} , maximum currents I_1 , I_2 , I_3 , voltage imbalance (phase-neutral), inversed phase rotation, maximum and minimum frequency values.

Draw-out DMX³ frame 2500

Fast clipping control accessories

You can remotely control the DMX³ thanks to its range of accessories: shunt trips, undervoltage releases, motor operators and closing coils.

All the control accessories are simply clipped on to the front panel of the circuit breaker, which is especially configured in order to facilitate the clipping.

Every type of accessory is compatible with its own location, in order to avoid any possible mistake.

All control accessories can be easily installed without any special tool and in a very short time. The installation is to be done on the front panel of the air circuit breaker. In that way, the separation between power and control circuits is guaranteed.

SHUNT TRIP

Shunt trips are devices used for the remote instantaneous opening of the air circuit breaker. They are generally controlled through an N/O type contact. The actual offer of shunt trips proposes different supply voltages from 24 V to 480 V compatibles with AC and DC currents. The shunt trips are already equipped with a special fast connector, to be directly inserted into auxiliary contacts block. An auxiliary contact is connected in series with the coil, cutting off its power supply when the main poles are open.

Shunt trip for DMX³ 2500 to 6300

	FOR DMX ³
Size	2500 to 6300
Rated operating voltage Vn	24 V ~/ 48 V ~/ 110 - 130 V ~/ 220 - 250 V ~/ 415 - 440 V ~
Voltage range (% Vn)	70 to 110
Pick-up consumption (W/VA)	500/500
Pick-up time (ms)	180
Hold consumption (W/VA)	5/5
Opening time (ms)	30
Insulation voltage (kV)	2.5

UNDERVOLTAGE RELEASE

Undervoltage releases are devices which are generally controlled by an N/C type contact. The trigger instantaneous opening of the circuit breaker if their supply voltage drops below a certain threshold and in particular if the control contact opens. These releases are equipped with a device for limiting their consumption after the circuit has been closed.

Undervoltage release for DMX³ 2500 to 6300

	FOR DMX ³
Size	2500 to 6300
Rated operating voltage Vn	24 V ~/ 48 V ~/ 110 - 130 V ~/ 220 - 250 V ~/ 415 - 440 V ~
Voltage range (% Vn)	85 to 110
Pick-up consumption (W/VA)	500/500
Pick-up time (ms)	180
Hold consumption (W/VA)	5/5
Opening time (ms)	60
Insulation voltage (kV)	2.5

CLOSING COILS

These coils are used for remotely controlling the closing of the power contacts of the circuit breaker. The springs of the circuit breaker are to be loaded prior to the action of the closing coils. They are controlled by an N/O type contact.

Closing coils for DMX³ 2500 to 6300

	FOR DMX ³
Size	2500 to 6300
Rated operating voltage Vn	24 V ~/ 48 V ~/ 110 - 130 V ~/ 220 - 250 V ~/ 415 - 440 V ~

Pick-up time (ms)	180
Hold consumption (W/VA)	5/5
Opening time (ms)	50
Insulation voltage (kV)	2.5

+++++

**LEGRAND
ADVANTAGE**

Electrical connection is made in no time thanks to the fast connector supplied on all above accessories.

**OTHER ELECTRICAL
FEATURES**

Number of control auxiliaries for DMX³ = 3
Shunt trip: 1
Undervoltage release: 1
Closing coils: 1

MOTOR OPERATORS

Motor operators, are used for remotely reloading the springs of the circuit breaker mechanism immediately after the device closes. The device can thus be re-closed almost immediately after an opening operation.

To motorise a DMX³ it is necessary to add a release coil (undervoltage release or shunt trip) and a closing coil.

If the supply voltage of the controls fails, it is still possible to reload the springs manually. Motor-driven controls have "limit switch" contacts which cut off the power supply of their motor after the springs have been reloaded. Motor operators are easy to mount, with only three screws.

Motor operator for DMX³ 2500 to 6300

SAFETY AND PADLOCKING ACCESSORIES FOR AN INCREASED SECURITY

The DMX³ circuit breakers draw-out types are delivered as standard with safety padlocking shutters preventing access to live terminals. They have a number of other safety devices, such as:

- Key-operated locks:
 - Main contacts open
 - Circuit breaker in draw-out position
- Padlocks for:
 - Main contacts open
 - Contact shutters closed (for draw-out position)
- Door locking in order to prevent the opening of the electrical switchboard door when the contacts of the ACB are closed.

Fixed version equipped with padlocking system

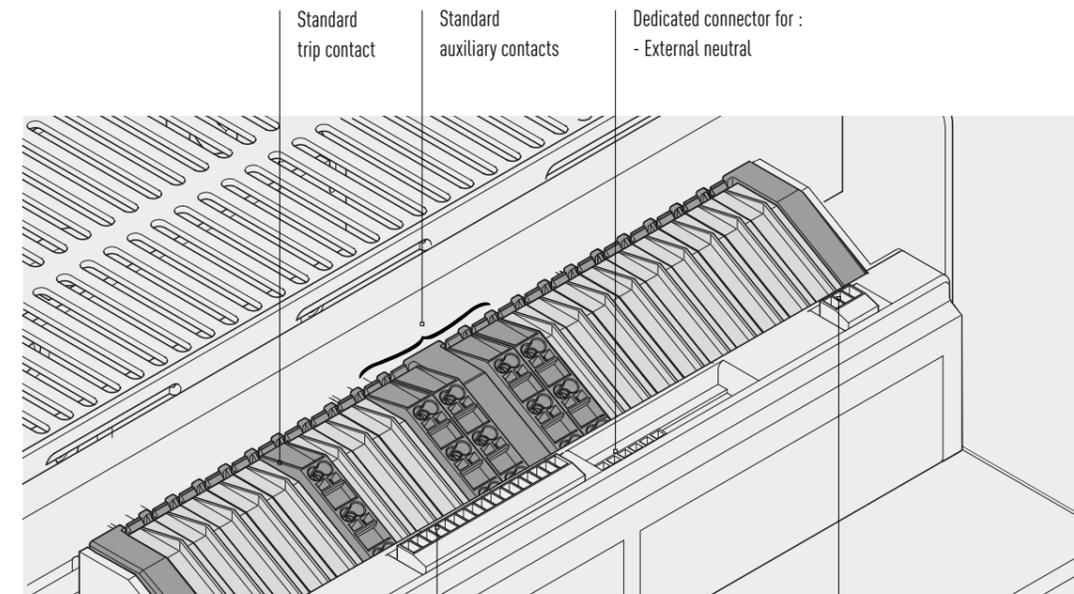

Draw-out version equipped with key-operated locks

Electrical auxiliaries are connected on the front panel on terminal blocks provided for this purpose. Accessories are identified on the front panel.

As the cover has window, it is easy to ascertain, which devices are fitted on the circuit breaker.

FRONT PANEL CONNECTION TERMINAL BLOCK

The terminal block of DMX³ ACBs offers the possibility to connect a trip contact, up to 10 auxiliary contacts (up to 6 contacts for DMX³ 1600) and different other control and signalling functions

Standard trip contact

Standard auxiliary contacts

Dedicated connector for :
- External neutral

Dedicated connector for :
- External auxiliary power supply
- Programmable contact module
- Supervision serial port (if the ACB is equipped with communication option)

Dedicated connector for:
- Local programmable relay (4 A Vmax 230 V a.c.)

Easy identification of control accessories

CONTINUED

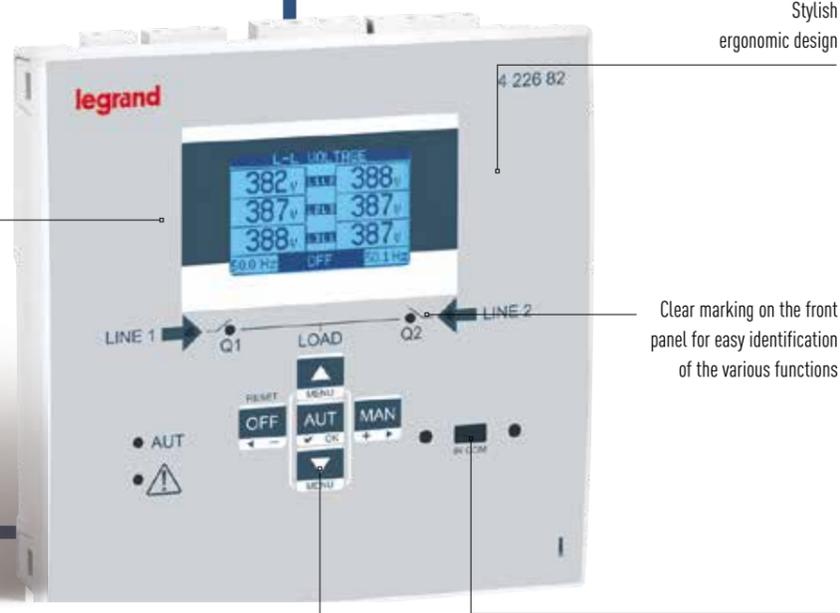

CONNECTIONS: A FEW RECOMMENDATIONS!

- Connections provide the electrical connection of equipment and are also responsible for a considerable proportion of their heat dissipation.
- Connections must never be under-sized.
- Plates or terminals must be used over a maximum area.
- Heat dissipation is encouraged by arranging the bars vertically. If an uneven number of bars is connected, place the higher number of bars on the upper part of the terminal.
- Avoid bars running side by side: this causes poor heat dissipation and vibrations.
- Place spacers between the bars to maintain a distance between them which is at least equivalent to their thickness.

Automatic transfer switches

Backlit screen, very easy to read, adjustable brightness and contrast. Menu available in 5 or 8 languages depending on unit model

Stylish ergonomic design

Clear marking on the front panel for easy identification of the various functions

Touch-sensitive buttons for programming the various operating parameters directly on the control unit

The optical communication port on the front can take a USB or a Wi-Fi connection module, which allows communication with a computer, smartphone or a tablet for programming, diagnostics and data downloading, without having to cut off the power to the electrical panel.

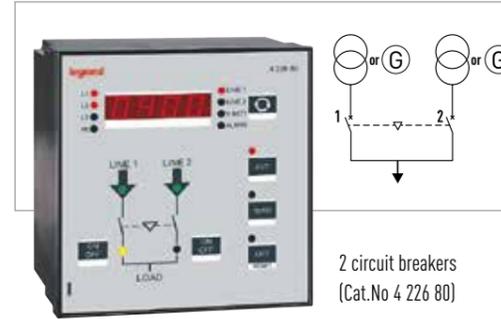

Continuity of service & increased safety

Automatic transfer switches answer the double need of continuity of service and greater safety (security). Traditionally used in hospitals, public buildings, industries with continuous manufacturing

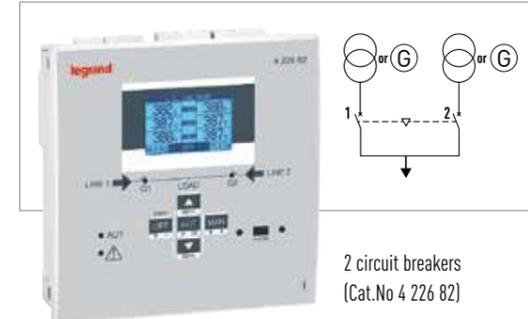

processes, airports and military applications, automatic transfer switches become increasingly required for new applications such as telecommunications and computing treatment or in the management of

energy sources, notably those say "renewable energies". Our range of control units includes 3 different types, depending on the desired service level.

STANDARD UNIT

CONFIGURABLE UNIT

Configurable models are fitted with an optical port designed to take communication modules. These modules can be used to configure the control units via a PC, tablet or smartphone, on which the software or Legrand app has already been installed.

LEGRAND ADVANTAGE

Thanks to its digital displays and different LEDs it is possible to watch permanently the state of the inverter, as well as the presence and the value of the voltage on each power supply.

Mechanical interlock device

Cable for mechanical interlock

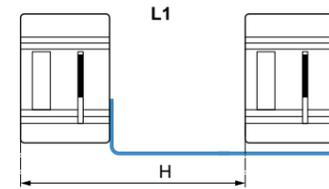

Transfer switching & interlocking

Mechanical interlock is set up using cables and a mechanical interlock device and can interlock 2 or 3 devices, which may be different type in a vertical or horizontal configuration.

The interlock device is mounted on the right-hand side of the air circuit breaker.

Be free to choose XL³ fully adaptable enclosure

It is very easy to create the configuration you want thanks to the different available sizes of XL³ S 4000 or XL³ 4000 and 6300 enclosures.

A full range of accessories, such as dedicated fixing plates and faceplates, facilitates the integration of DMX³ devices inside the enclosures.

XLPro³ software let you choose the optimum configuration between XL³ and XL³ S, according to the size and the requirements of your installation.

MOUNTING PRINCIPLE

In XL³ and XL³ S, the DMX³ devices and the associated busbars are arranged according to an identical principle for power ratings up to 4000 A, that is, the possibility of mounting two devices per enclosure.

The installation height of DMX³ units is always 600 mm whatever the type and size of the device. When 2 DMX³ devices are installed in the same cell, this leaves at least a useful 600 mm for running the busbars.

Control and signalling auxiliaries

Pack	Cat.Nos	Control and signalling auxiliaries
1	0 288 48	Shunt trip When energised the circuit breaker will be tripped
1	0 288 49	24 V~/=
1	0 288 50	48 V~/=
1	0 288 51	110 - 130 V~/=
1	0 288 52	220 - 250 V~/=
1	0 288 52	415 - 480 V~
		Undervoltage releases When the coil is de-energised, the circuit breaker will be tripped
1	0 288 55	24 V~/=
1	0 288 56	48 V~/=
1	0 288 57	110 - 130 V~/=
1	0 288 58	220 - 250 V~/=
1	0 288 59	415 - 480 V~
		Module for delayed tripping To be used with above undervoltage releases
1	0 288 62	110 V~/=
1	0 288 63	230 V~/=
		Motor operators To motorize a DMX ³ , it is possible to attach, to the motor operators, a release coil (undervoltage or trip on energising) and a closing coil
1	0 288 34	24 V~/=
1	0 288 35	48 V~/=
1	0 288 36	110 - 130 V~/=
1	0 288 37	220 - 250 V~/=
1	0 288 38	415 - 440 V~
1	0 288 40	480 V~/=
		Closing coils Enables remote closing of the circuit breaker if the closing spring is charged
1	0 288 41	24 V~/=
1	0 288 42	48 V~/=
1	0 288 43	110 - 130 V~/=
1	0 288 44	220 - 250 V~/=
1	0 288 45	415 - 480 V~
		Signalling contact for auxiliaries Signalling contact for shunt trips, undervoltage releases and closing coils
1	0 288 16	
		Signalling contact for draw-out version Inserted / test / draw-out signalling contact
1	0 288 13	3 changeover contacts per position

Locking

Pack	Cat.Nos	Locking
1	0 288 30	Key locking in "open" position Lock and star key N° HBA90GPS6149 - to be fitted on the frame Cat.No 0 288 28
1	0 288 31	Lock and flat key N° ABA90GEL6149 - to be fitted on the frame Cat.No 0 288 28
1	0 288 28	2 hole support frame for locks
1	0 288 29	Cat.Nos 0 288 30/31 Set of 5 key barrels with flat key
		Key locking in the draw-out position Mounting of the lock on the base
1	0 288 32	Lock and star key N° HBA90GPS6149
1	0 288 33	Lock and flat key N° ABA90GEL6149
		Door locking Prevents opening of the door with the circuit breaker closed
1	0 288 20	Left-hand and right-hand side mounting
		Padlocks in "open" position Padlocking system for ACB (padlock not supplied)
1	0 288 21	Padlock for buttons
1	0 288 24	Padlock for shutters (padlock not supplied)
1	0 288 26	Padlocking system for shutters (padlock not supplied)
		Equipment for conversion of a fixed device into draw-out device
		Bases for draw-out device For DMX ³ /DMX ³ -I frame 2500

Automatic transfer switch control units

Technical characteristics p. 50
Configuration software see e-catalogue

They can control transfer switching between two sources, manage generator start/stop, control single phase, two-phase and three-phase networks, control phase-phase and phase-neutral voltages
For DPX³ and DMX³ circuit breakers and CTX³ contactors

Pack	Cat.Nos	Automatic transfer switch control units
1	4 226 80	For standard management of 2 circuit breakers 6 programmable digital inputs and 6 programmable relay outputs Digital display Power supply: 12...48 V _{DC} IP54
1	4 226 82 ¹	For advanced management of 2 circuit breakers 6 programmable digital inputs and 7 programmable relay outputs Can be equipped with maximum 2 plug-in modules between: - extension modules Cat.No 4 226 90/91/92 - opto-isolated RS485 communication interface Cat.No 4 226 89 LCD display IR communication port on the front panel for connection of USB or WiFi modules Cat.No 4 226 87/88 Can be configured with the help of front panel touch keys or of the Legrand dedicated software Power supply: 12-24 V _{DC} ; 110-240 V _{AC} IP40
1	4 226 83 ¹	For advanced management of 3 circuit breakers 8 programmable digital inputs and 7 programmable relay outputs Can be equipped with maximum 3 plug-in extension modules between Cat.No 4 226 90/91/92 Integrated opto-isolated RS485 communication interface LCD display IR communication port on the front panel for connection of USB or WiFi modules Cat.No 4 226 87/88 Can be configured with the help of front panel touch keys or of the Legrand dedicated software Power supply: 12-24-48 V _{DC} ; 110-240 V _{AC} IP65

Pack	Cat.Nos	Dual power supply selector
1	4 226 86	Dual power supply selector measures and controls two supply voltages at its inputs (single phase, 230 V _{AC}) and selects the most adapted voltage for auxiliary circuits supply Equipped with 1 alarm contact, if no supply voltage can be selected within the limits
1	4 226 89	Plug-in modules Opto-isolated RS485 interface
1	4 226 90	4 opto-isolated static outputs
1	4 226 91	2 relay outputs, rated 5 A 250 V _{AC}
1	4 226 92	2 opto-isolated digital inputs and 2 relay outputs rated 5 A 250 V _{AC}
1	4 226 87 ¹	Communication accessories These communication devices can be used to connect Alptec 8 and Alptec 3.2/5.2/8.2 power factor controllers and automatic transfer switch controllers to a computer; smartphone or tablet For programming, downloading data, diagnostics and upgrading the firmware USB front connector Computer connection cable with USB connector The computer identifies the connection as a standard USB connection. There is no need to switch off the controller power supply

I_r, t_r, I_i, I_g, t_g, I_{sd}, t_{sd}, adjustment on front panel

• **Long time delay protection against overloads**
I_r from 0.4 to 1 x I_n (6 + 6 steps) on two selectors (0.4 ∅ 0.9, by steps of 0.1 and 0.0 ∅ 0.1, by steps of 0.02)

• **Long delay protection operation time**
t_r - at 6 x I_r (4 + 4 steps) t_r = 5-10-20-30 s (MEM ON) 30-20-10-5 s (MEM OFF)

• **Short time delay protection against short circuits**
I_{sd} from 1.5 to 10 x I_r (9 steps) I_{sd} = 1.5-2-2.5-3-4-5-6-8-10 x I_r

• **Short time delay protection operation time**
t_{sd} from 0 to 0.3 s (4 + 4 steps) t_{sd} = 0-0.1-0.2-0.3 s (t=const), 0.3-0.2-0.1-0.001 s (I²t=const)

• **Instantaneous protection against very high short circuits**
I_i from 2 to 15 x I_n or I_{cw} (9 steps) I_i = 2-3-4-6-8-10-12-15 x I_n or I_{cw}

• **Earth fault current**

I_g from 0.2 to 1 x I_n (9 steps) I_g = 0.2-0.3-0.5-0.6-0.7-0.8-1 x I_n : OFF
t_g from 0.1 + 1 s (4 steps) t_g = 0.1-0.2-0.5-1 s (both t = const and I²t = const)

• **Neutral protection:** I_n = OFF - 50% - 100% - 100%

Selectivity in three-phase network 415 V~
